

Caring For Your Vicenza Designs Hardware

For the most part, simply dusting your Vicenza Designs' hardware is all that is necessary. You may use a very soft brush to remove dust from designs and crevices, and a soft micro-fiber cloth to gently dust the surface. If necessary you may clean with a soft damp cloth using a mild dish soap. Generally, your Vicenza hardware will not require anything more than this to stay looking as beautiful as ever.

With the exception of Vintage Pewter, Antique Silver and Polished Silver finishes, we do not recommend any additional measures, other than the gentle cleansing described above. In the event that your polished, non-plated hardware (Vintage Pewter, Antique Silver and Polished Silver) should require deeper cleaning, you may use a non-abrasive metal polish with a soft cloth to restore your hardware to its original luster.

NOTE: Never use abrasive cleaners, abrasive pads or mechanical polisher on any of the Vicenza Designs' hardware, as these will mar the finish.
